Your recognized specialist in Chair Raisers

Kids

Whenever your kids are out of control, you can take comfort from the thought that even God's omnipotence did not extend to God's kids. After creating heaven and earth, God created Adam and Eve. And the first thing said to them was: "Don't." "Don't what?" Adam replied. "Don't eat the forbidden fruit." God said. "Forbidden fruit? We got forbidden fruit? Hey, Eve...we got Forbidden Fruit! No way! Yes WAY!" "Don't eat that fruit!" said God. "Why?" "Because I'm your Creator and I said so!" said God, wondering why he hadn't stopped after making the elephants. A few minutes later God saw the kids having an apple break and was angry. "Didn't I tell you not to eat that fruit?" the first parent asked. "Uh huh," Adam replied. "Then why did you?" "I dunno," Eve answered. "She started it!" Adam said. "Did Not!" "DID so!" "DID NOT!!!" Having had it with the two of them, God's punishment was that Adam and Eve should have children of their own. Thus the pattern was set and it has never changed. But there is a reassurance in this story. If you have persistently and lovingly tried to give them wisdom and they haven't taken it, don't be too hard on yourself. If God had trouble handling children, what makes you think it would be a piece of cake for you?

Multifit Leg Lifter now selling in the Netherlands and France

We have yet another new overseas Distributer. CYMEQ are a large company based in Capelle aan den IJssel near Rotterdam. This month we sent our export Manager Simon Fawkes to represent Multifit at International trade fairs in Utrecht near Amsterdam and Autonomic in Paris. It is very exciting for us at Multifit to be exporting our own product and we do appreciate all the feed back that New Zealand OTs have given us that has help to make the Leg Lifter such a success.

I have also learnt this week that a Danish company have received a government grant to conduct a 12 month long case study on the Leg Lifter. The results of which will influence the buying decisions of many European therapists. Its all looking very good indeed.

Regards, Wayne

Safe er Grip **TRAVELLER** Balance Assist Handle

The Traveller suctions to any smooth surface and fits where longer handles won't. The safety grip you rely on at home packs easily for travel. To be used as a balance assist only. Not for body weight leverage. Maybe suitable for : Suction onto a desk top to help with unsteady arms. Opening fridge doors. Etc

Hints & Tips

Many OTs are saying that they wish our Divan Raisers were on the common list. The best way to make this happen is to write to enable or accessible.

JENZ SAY

Hello all

Not sure what happened to April & May!

Been such a busy time and suddenly we are nearing the end of June.

Only just getting into the cold stuff here. We have had a our share of the weather bombs and lots of flooding and earthquakes here in Whakatane!

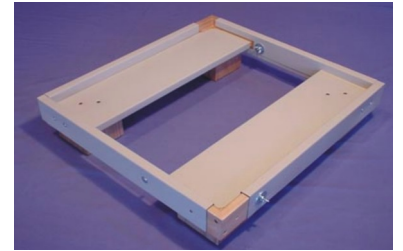

However "the show must go on" and the raisers are still flying out the door so that's all good. We have a new little "gadget" in our Safe Er Grip range of products. It has arrived since the Expo and should be a winner especially for children with little hands. Small enough to stick on a desk top. See the picture over the page.

I now enjoy a 3 day weekend and we have a new person Rachelle here on Fridays. Rachelle's a cheery lady and will take your calls and dispatch your orders.

Regards Jennifer

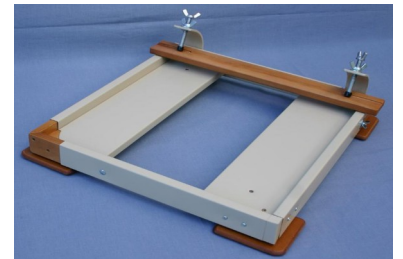

Standard chair raiser (MF 1/1)

Adjustment	Code	Width (mm)	Length (mm)
Standard	MF 1/1	483 - 816	528 - 873

Morning Tea for your Department

We really value your support. You promote our business in many ways and we appreciate it.

Last months' winners

April Clare Roberts Burwood
 May Chris Hillier Whanganui

Help your client to feel safer and more confident.

Recent improvements to reduce sideways movement of the Bed Lever while fitted to the bed greatly enhance the steadiness of the lever, helping your client to feel safer and more confident.

Types of beds they will fit

Inner sprung beds , Slat beds, some profiling beds.

Slat beds have a wooden base with a lip around the edge. This makes it impossible to fit the traditional Bed Lever because the bulky wooden block under the hand rail gets in the way. The Multifit Bed Lever has no such block and so can easily fit to slat beds and inner sprung beds alike making them more universal for reissue.

Maximum user weight 100kg
 Rail height 550mm
 Optional fittings Cord & Cleat

Optional - anti entrapment safe rail divider

Donation reaches \$465.00!

WOW your orders for bed levers have been coming in thick and fast. We have sold 93 bed levers since February and as promised we are donating \$5.00 for every bed lever that you ordered to help the earthquake victims in Haiti.

Haiti earthquake disaster response

(<http://www.savethechildren.net>)
 With vast areas of Port-au-Prince lying in ruins, Save the Children is helping the families living in temporary make-shift camps and plan longer term rehabilitation and reconstruction.

- Delivery within **5 working days** or we will shout your **whole OT department morning tea** . (*customised & developmental equipment may take a little longer*)

Multifit LegLifter Mk3

Gentle bedside assistance for the elderly and disabled

Increased independence for patients, easier management for health professionals

The Multifit LegLifter is an appliance designed to provide independence for elderly and disabled people who are unable to lift their legs from a bedside sitting position onto the bed. Depending on the level of disability, the task of getting into bed safely can be performed with little or no assistance from another person.

Easy to use

With simple push-button commands, the Multifit LegLifter gently carries the legs from the side of the bed to the prone position on the bed surface, then returns the leg-rest to its bedside position.

Smooth, silent action

Precision-engineered componentry and robust construction ensures quiet performance and safe, gentle operation.

Easy operation and safe, friendly ergonomics make the Multifit LegLifter an ideal bedside companion.

Adaptable for domestic and profiling beds

A standard Multifit LegLifter is designed for installation to a typical domestic bed with an innerspring base. Adaptations for other domestic bed bases and profiling bed types can be supplied on request. Multifit LegLifter is height-adjustable over 200mm to suit a range of bed heights.

Installs in minutes

Multifit LegLifter installation for standard domestic beds and many profiling beds takes from five to ten minutes, with no tools required.

Portable and compact

Multifit LegLifter's light 11 Kg weight, compact dimensions and slim contours make it easy to carry and transport, even in a small vehicle.

High performance and durability

Multifit LegLifter Mk3 has been tested successfully for durability to 10,000 cycles.

New Mk3 features include:

A wider leg-rest option, refined ergonomics, battery backup option, firmer stabiliser, and a new lift arm to create more seating space on the bed. A refined lifting action assists patients with diminished balancing ability, and a handset light turns off when the leg-rest is lowered safely beside the bed.
